This is exactly what it looks like. The bouncing has a satisfying little sound to it and the gameplay is simple and fun. I got it because I thought it might be suitable while listening to podcasts and audiobooks. The main improvements I'd like to suggest are: (1) the ability to use the mouse to aim and fire the ball; (2) a way to jump to specific levels; (3) repeating the level by default instead of advancing.. just bought it so i can see if refund workes. pretty good game. pretty good game. Good fun game. Only minor complaint is that the shots don't seem to be deterministic.. Simple and clever and pain-free. I've never played pao, but if I had, this would put me in mind of its hypnotizing rhythm of shoot, watch, repeat.
