I purchased this for my children in hopes of expanding their educational. Unfortunately, it turned out to be a buggy mess with horrible controls. Purchased on launch date, a week, I was hoping the developers would have fixed the bugs by now. Joystick controllers will launch your character sideways, frequent stuck in the walls and there isnt even a QUIT game option on the main menu!

Interesting concept if it was executed properly, but at this state, it's shovelware at it's finest.

Steam refund requested.. This game is a great idea poorly executed.

The game controls are flawed, parts of the map you should be able to walk on are blocked, and game mechanics are missing.

The game developers need to spend a lot more time on this game and try again. I got to a point where I couldn't proceed because I was playing the mini games and the game wasn't counting them as completed, meaning I couldn't move on to the next stage.

I don't yet recommend this game because it's far from complete. But one day absolutely.
